ADDRESS 3549 Esplanade #209

CITY/STATE/ZIP Chico, CA 95973

Dear Executive Director Snow,

I urge you to ensure that CalFed puts forth and selects a new "Smart Alternative" based on conservation and restoration to provide reliable, high-quality water for California's people and wildlife. The "Smart Alternative" would:

- \* ensure strong conservation programs and economic incentives to use our water more efficiently;
- \* maximize water efficiency before even considering costly new dams and reservoirs or a Peripheral Canal;
- \* restore and protect our watersheds and groundwater basins;
- \* restore California's fish, birds, wetlands, rivers, delta and bays, but not at the expense of other habitats.

Please enter these comments into the formal record for your Draft Programmatic Environmental Impact Report and Statement.

Sincerely,

JUL 01 1998

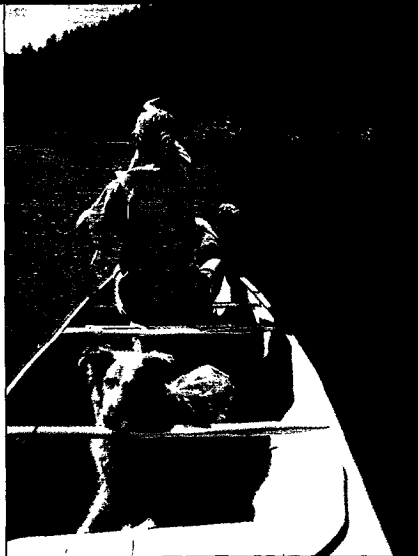

01769

Lester Snow  
Executive Director  
CalFed Bay/Delta Program  
1416 Ninth Street
